## FIRE RATED SYSTEMS

Manko Window Systems is proud to partner with Vetrotech Saint-Gobain to provide fire rated systems. In an effort to complete our fire rated portfolio, Manko will provide Vetrotech's VDS® steel door and framing systems. Based on narrow profile steel sections, VDS® provides maximum convenience through ease of installation with both fire protective (contains smoke and flame) and fire resistive (provides barrier against heat) opportunities. For additional questions, quoting, or orders regarding VDS® products, please contact your Manko representative.

### VDS® Products

- VDS® Frames
- VDS® Doors
- VDS® Curtainwall
- VDS® Lite Frames
- VDS® Lite Doors
- VDS® Hollow Metal Frames
- VDS® Hollow Metal Doors

***vetrotech***  
SAINT-GOBAIN

Combine these VDS® products with Vetrotech's CONTRAFLAM® (intumescent fire resistive glass), CONTRAFLAM® STRUCTURE (butt-jointed all glass partitions), KERALITE® (20-180 minute fire protective glass ceramic), or PYROSWISS® (specially tempered 20 minute fire rated glass), and Manko has a solution to all of your fire rated needs.
