A BEAUTIFUL THING

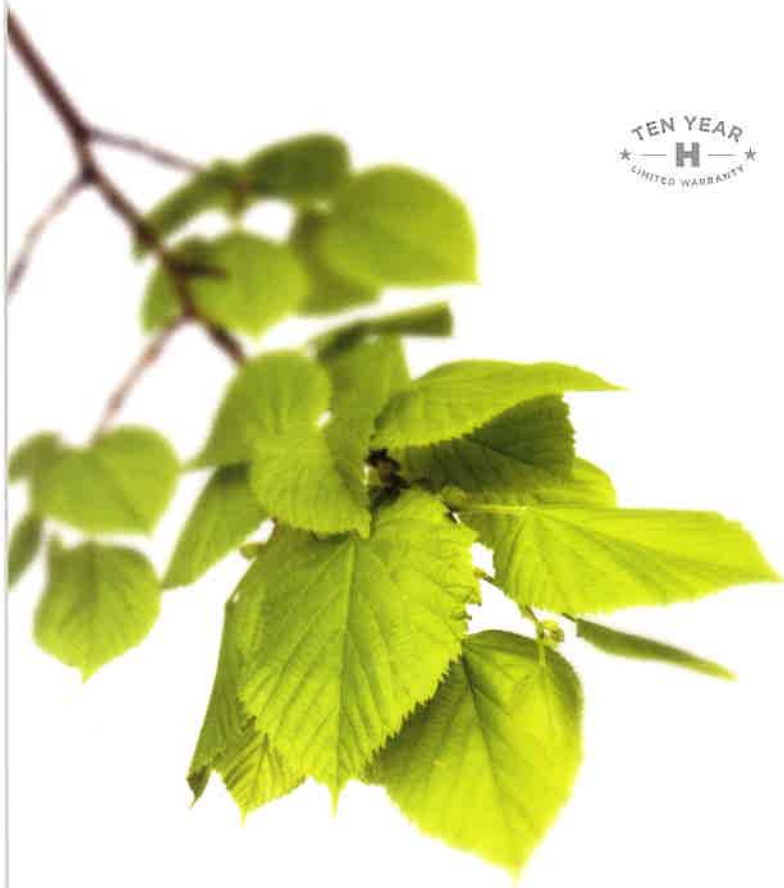

H Windows are built to last a lifetime. They are also built to be extremely efficient, meaning savings on your energy bill.

- Glazing depth from 1" to 1.375" (multiple glass options available, including triple pane)
- Composite aluminum/wood frame and sash for durability, stability and thermal performance
- Standard powder coat finish meets AAMA 2604; Kynar™ and anodized finishes also available
- Removable glazing cap makes glass replacement easy
- Glazing system is vented and weeped to ensure dissipation of any moisture potential
- Butyl thermal/moisture barrier

- Scores better on 50 mph air infiltration tests than most windows do at 25 mph
- FSC (Forest Stewardship Council) Certified by Smartwood
- Member of NFRC (National Fenestration Rating Council)
- Energy Star Certified
- Approved by MNSCU (Minnesota State Colleges & Universities) and MASBO (Minnesota Association of School Business Officials)
- High-performance, low-E coated glass for superb energy/thermal properties
- Argon-filled with warm-edge spacer technology for maximum efficiency
- Triple-pane glass available for excellent thermal performance

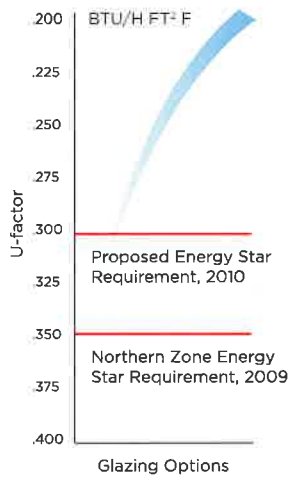

The H Window outperforms the competition in total performance tests—no operable window seals tighter. Because of the unique H-hinge design that allows an uninterrupted perimeter seal, the harder the wind blows, the tighter the H Window becomes.

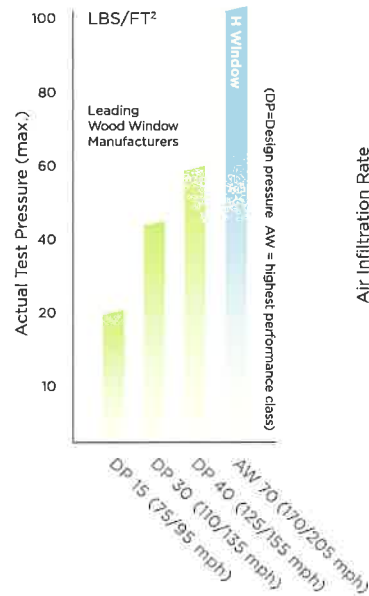

FOREST STEWARDSHIP COUNCIL-CERTIFIED WINDOWS AVAILABLE

ECO-FRIENDLY

**YOUR MAINTENANCE CREW MIGHT FORGET
ALL ABOUT THEM, AND THAT'S OKAY.**

Your windows stay as beautiful as the day you installed them, with minimal effort.

DURABILITY

- *Extruded aluminum exterior windows are maintenance free and structurally stronger than aluminum-clad windows*
- *Engineered in Europe and manufactured in America*
- *Dry glaze system allows the glass to be replaced without requiring special tools*
- *Meets the Americans With Disabilities Act; requires less than 5 pounds operating force*
- *On-site assistance for the contractor during installation*
- *Screen features extruded aluminum frame with staked corner keys for strength*

LET THE GOOD STUFF IN.  KEEP THE BAD STUFF OUT.

Take in sunlight, beauty and the view without sacrificing security. H Windows have the highest forced-entry security rating in the industry.

F.

SECURITY

- Ventilating system integrates a full-width locking rod for tight sealing and security
- Meets most fire egress codes without a special type of hardware or special operating knowledge
- Exterior grills are heavyweight extruded aluminum with available tamper proofing

G.

Beauty is in the details. It's in the unique

Norwegian-designed, American-made window

that delivers superior quality and ease of use.

{ BEAUTY }
COMES STANDARD
WITH EVERY WINDOW.

It's in the maintenance-free engineering, which

means fewer moving parts to deal with. And it's

in the monumental performance, with some of

the highest ratings in the industry.

SIMPLY REVOLUTIONARY™

For over 50 years, we have been building beautiful custom-fit windows for buildings just like yours.
To bring the beauty of HWindows to your project, call **800 THE HWAY**.
