Product News: Greenfield High Performance Products

Dear AluSpec Customers,

We are pleased to bring you *Greenfield Products*, (*GP*) because they are dedicated to providing performance parts to our industry - specifically engineered for glass and glazing firms. No need to "make do" with hardware made for hollow metal doors. No need to put up with thin extrusions and screw pull outs. Put some high performance into your installations and profits in your business - with GP; products that fit and work.

Our most popular GP product is their "**Keyed Removable Mullion**":

- Fabricated from aluminum framing matching your door frame.
- Easy-to-install and easy-to-remove features.
- Provides a keyed locking mechanism housed within mullion cavity.
- Mounting plates are affixed to header of frame and sill condition.
- Creates two single doors for improved weather seal.
- Better product for your customer and can save you hundreds of dollars over competitors' keyed removable mullions.
-

Greenfield Products are designed to make your installations easier and high performance. Here are some other GP products to help minimize call backs:

- 3/16" steel closer reinforcing plates.
- Aluminum reinforcing for variety of hardware components.
- Slim line electric strikes.
- Panic strikes with weathering and back up plates.
