

4032xpt (608) 825-4838 FIXED CASEMENT PROJECT IN/OUT GO

Manko's 4032xpt series was specifically designed to provide an efficient, high performing window to an industry seeking thermally enhanced products. The 4032xpt is a member of a family of projected windows utilizing the same exterior die profile with interchangeable thermal struts depths and interior dies to create six different frame depths. Specifically, the 4032xpt uses a 36mm polyamide crimped in place structural thermal barrier to create a 4" overall window with a 3 1/4" vent. This specific strut provides superior frame performance and can be used in conjunction with dual or triple pane insulated glass. Main frame construction is mortise and tenon joinery with dual integral screw races. Operable sash uses mechanically joined, angle reinforced, mitered corner construction. The 4032xpt is tested to AAMA

Alu Spec

your local sales rep

Fenestration

- \Rightarrow 4" overall frame depth, 3 1/4" vent depth
- \Rightarrow 1" to 2 1/2" glazing options
- \Rightarrow Preglazed at factory for added quality control
- \Rightarrow Exterior grids available (beveled, cove, OG)
- \Rightarrow Interior surface applied & between glass muntins available
- \Rightarrow Hermetically sealed, hinged sash, and take-out sash blinds available
- ⇒ Panning systems & interior snap trims available
- Receptor systems available w/optional starter sill \Rightarrow
- \Rightarrow Custom profiles & configurations available
- \Rightarrow Full range of anodized & painted finishes, including dual finish capability
