DIGITAL IN-GLASS PRINTING

Manko Window Systems is proud to offer digital in-glass printing by Dip-Tech. Produced in our Manhattan Kansas location, this product has the ability to design and create printing solutions that combine the durability of ceramic inks with the versatility and quality of digital printing. With a single source, Dip-Tech offers a proven solution to all of your interior and exterior printing applications. For additional information regarding this innovative product, please contact your Manko representative or visit our website.

Features:

* Easy implementation

Of any pattern or design, with unlimited colors and high resolution for fine details.

* Durability and accuracy

Inks are fused into the glass, providing unmatched resistance to scratching, acid, UV light, and weather. Precise micro-drop printing allows accurate photorealistic and graphic designs.

* A new medium for expression

The ability to combine transparent, translucent, and opaque details in any way. Offering full freedom in colors and shades, and the possibility to create double-vision designs for different front and back experiences. Dip-Tech is moving glass printing into the realm of tools for design.

Facts:

- ◆ Maximum glass size — 72" x 120"
Contact Manko for larger sizes and thicknesses
